

Changes to the Auth0 Management Dashboard

Our Auth0 tenant is now using the new version of the Management Dashboard. Even though the core functionality is the same, there are some changes to the navigation structure that we would like to call out, so we can avoid confusion and have a chance to update internal documentation where applicable.

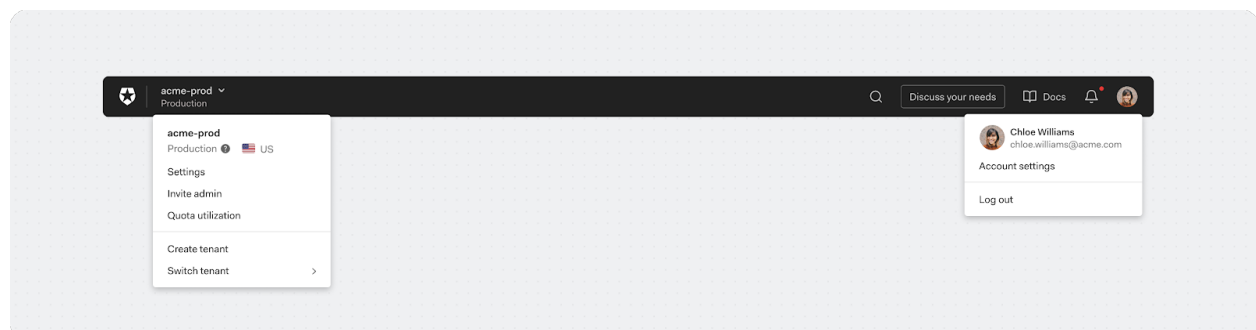

Sidebar Navigation

Current navigation	New navigation
Getting Started (only for new tenants)	<i>No changes</i>
Activity	<i>No changes</i>
Applications	Inside the “Applications” group (with “APIs” and “SSO Integrations”)
APIs	Inside the “Applications” group
SSO Integrations	Inside the “Applications” group
Connections	Renamed to “Authentication”
Universal Login	Inside the "Branding" group

Users & Roles	Renamed to "User Management"
Security	<i>No changes</i>
Actions	<i>No changes</i>
Rules	Inside "Auth Pipeline" group
Hooks	Inside "Auth Pipeline" group
Emails	Inside "Branding" group
Marketplace	<i>No changes</i>
Extensions	<i>No changes</i>
Tenant Settings	Now available on the sidebar menu

Top Navigation

The top navigation now has separate menus for tenant-related and user-related activity, which makes it easier to display relevant information at the tenant level and avoids confusion with user information.

Tenant Menu

The Tenant menu appears on the left side of the header and displays the tenant name, region, and environment tag (production, staging, or development). All tenant management sections are contained within it.

User Menu

The User menu appears on the right side of the header and displays your user information and settings.
